Short Press Note for HF Conflux 2022

SCTIMST to organize virtual meet on heart failure research

A two-day virtual conference “Heart Failure Conflux 2022” focussed on basic and clinical research in heart failure will begin on Friday, February the 4th. The ICMR Centre for Advanced Research and Excellence in Heart Failure (CARE-HF) at the Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), along with Heart Failure Association of India (HFAI) and International Academy of Cardiovascular Sciences (IACS) is organizing this meeting.

Dr.V.K.Ajith Kumar, Director of SCTIMST, will inaugurate the conference.

Dr Harikrishnan S., Professor of Cardiology, who is the organising secretary of the conference said that Heart failure (HF) is a staggering clinical and public health problem which is associated with significant mortality, morbidity, and healthcare expenditure. It affects Indians 10

years earlier and the 5-year mortality of nearly 60% is higher than many common cancers. Online meeting platforms like this would enhance research collaboration among clinicians and scientists for the discovery of novel therapeutics. In addition to several faculty from the USA, Germany and Spain, prominent national faculty are speaking at the online event. The ICMR centre of excellence in heart failure runs the first Heart Failure Biobank in the country at SCTIMST along with many collaborative research projects.
