

Workshop on TISSUE ENGINEERING FOR MEDICAL APPLICATIONS

The exciting and very promising field of Tissue Engineering and Regenerative Medicine includes variety of tools to develop biological substitutes mimicking tissues for basic research, disease/therapy and diagnostic purposes.

June 28 – 29, 2019

Target Audience:
Faculty, Researchers,
Students

The workshop tries to give an overview on the following:

- Tissue engineering for medical applications
- Biomaterials for tissue engineering applications
- Stem cell Research for tissue engineering applications
- 3D scaffolds for tissue engineering
- Bioprinters and Bioreactors
- Skin and Bone tissue engineering

Registration Fee: **Rs. 3500/- for faculty/staff and Rs. 2000/- for students both inclusive of GST** (The registration fee includes the conference kit and lunch for two days).

Venue: **Biomedical Technology Wing, SCTIMST, Poojappura, TVM**

Last date of Registration : **21st June 2019**

*If interested, please register along with the registration form available at the website.
