Introduction to Transesophageal Echocardiography

The Focused Basic TEE (FB-TEE) cum live workshop

TEE Coordinators: Dr Unnikrishnan KP, Additional Professor, Dr. Thomas Koshy, Professor

SCTIMST, Trivandrum.

LEARNING OBJECTIVES:

Upon conclusion of the FB-TEE the attendee should have

1. Understood the indications, contraindications, and potential complications of perioperative TEE
2. Understood the conventional 20 views to evaluate cardiac anatomy
3. Knowledge of commonly encountered blood flow velocity profiles and clinical utilities of Doppler echocardiography
4. Understood the echocardiographic presentations of myocardial ischemia/infarction
5. Understood the echocardiographic manifestations of native valvular lesions and dysfunction
6. Knowledge of echocardiographic presentations of normal and abnormal ventricular function
7. Understood the echocardiographic presentations of common congenital heart defects
8. Understood basic TEE knobology platforms and common imaging controls used to obtain and optimize images using simulator
9. Ability to generate 20 views using TEE simulator
10. The Quiz aims to provide attendee exposed to a series of clinical cases involving recognition of cardiac anatomy and its TEE signature, echo principles, pitfalls and limitations of TEE
