THEME: Improving Diagnosis for Patient Safety
SLOGAN: "Get it right, make it safe"

20th September, 2024

Auditorium 2, SCTIMST

Patient Safety Day Celebration

Greetings Everyone,

World Patient Safety Day, one of WHO's global public health days, carries forward its mission into 2024. Established in 2019 by the Seventy-second World Health Assembly through the adoption of resolution WHA72.6 – “Global action on patient safety” and observed annually on 17 September, World Patient Safety Day is the cornerstone of action to promote global health and safety. It is firmly grounded in the fundamental principle of medicine – “first do no harm”. Its objectives are to increase public awareness and engagement, enhance global understanding, and work towards global solidarity and action by Member States to promote patient safety.

Recognizing the critical importance of correct and timely diagnoses in ensuring patient safety, “Improving diagnosis for patient safety” has been selected as the theme for World Patient Safety Day 2024.

The SCTIMST Safety Steering Committee is pleased to invite you to a special talk on **Patient Safety** in honor of World Patient Safety Day. The event will be held on **20th September 2024, 2:00 pm, at Auditorium 2, SCTIMST.**

This gathering aims to foster discussions and raise awareness about patient safety practices, featuring valuable insights from, **Consultants, Resident Doctors and Nursing Officers.** We look forward to your valuable participation and contributions towards enhancing patient safety. Kindly confirm your presence at your earliest convenience.

Warm Regards,
Nirmal M.O.,
Nursing Superintendent and Chairperson Safety Steering
Committee
